

MCSE

Microsoft Certified System Engineer (MCSE) is de hoogste certificering voor professionals die business vereisten analyseren, infrastructuur implementeren en ontwerpen gebaseerd op Microsoft Windows® 2000 platforms en Microsoft Windows Server System™.

Hoe behaald u uw Microsoft Certified System Engineer certificaat?

Om uw Microsoft Certified System Engineer (MCSE) certificering te behalen moet u slagen voor 7 examens.

- Vier core examens op networking systems
- Een core examen op client operating systems
- Een core design examen
- Een keuze examen

Een stapje lager is er de MCSA status. Vanaf Windows Server 2008 verandert deze certificatie van naam. Het wordt dan MCITP: Enterprise Administrator, Microsoft Certified IT Professional: Enterprise Administrator.
