PRINCE2® Foundation

Goal

The PRINCE2® Foundation course covers the basics of the PRINCE2® method. The training course is aimed at giving delegates an understanding of the philosophy behind the PRINCE2® method and also at preparing delegates for the official PRINCE2® Foundation exam.

Participants

This course is suitable for project managers, team managers, project support staff, and quality assurance staff and for anybody else who is somehow involved in participating or running one or more projects.

Course description

Delegates will be shown how the model is setup, how the different project activities and project roles are linked together and how PRINCE2® deals with exceptions that are imminent to occur in any kind of project. During the PRINCE2® Foundation course delegates will learn how to set up a project management organization that is responsible for managing and planning the project. Delegates will be taught how to define the different project management roles to guarantee that the project is run in a most effective and efficient way. The method of management by exception will play a crucial role in handling project issues.

An accredited PRINCE2® trainer will give the training course. The course consists of a mix of (mostly) theory and practical exercises. Most of the exercises will be done in small groups.

Delegates can take the official PRINCE2® Foundation exam on the third afternoon. To take the PRINCE2® Practitioner exam delegates must have passed the PRINCE2® Foundation exam.

PRINCE2® is a Registered Trade Mark of the Office of Government Commerce in the United Kingdom and other countries
