

## **PRINCE2® Practitioner**

### **Goal**

This course is meant to learn, understand and use the PRINCE2® method in a project environment. It is also meant to prepare the delegates for the official PRINCE2® Practitioner exam.

### **Delegates**

This course is particularly suited for people who manage one or more projects and (thus) want to take the PRINCE2® Practitioner exam.

### **Course description**

Although there is no **access requirement** for this course, we recommend that delegates – at least – attended a PRINCE2® Foundation course.

To participate in the **exam** one *must* have passed the PRINCE2® Foundation exam!

This course can be taken as a 3-, but also as a 2-day training. The main part consists of practicing with exam-like questions. In both cases, the last afternoon is for taking the PRINCE2® Practitioner exam. On the first day of a 3-day course delegates will mainly practice making PRINCE2® documents according to the PRINCE2® methodology (see below for a course table).

This course is the ideal preparation to a PRINCE2® Practitioner exam and is given by an accredited PRINCE2® trainer.
